**Part III DETAILED ACTION**

**Notice to Applicant(s)**

1. This application has been examined. Claims 1-16 are pending.

***Information Disclosure Statement***

2. The references listed in the Information Disclosure Statement dated 10/31/01 have been considered by the Examiner and is attached to this Office Action.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Shima (U.S. 6,149,323).

Art Unit: 2626

With respect to claims 1, 8, 10, 11, 12, 13, 14, 15, and 16, Shima discloses a method of controlling a printer (5) using an application in a computer system (figure 1), comprising choosing, in the computer system, a group of printer settings from a group of potential printer-setting sources (the abstract, lines 4-6); associating, in the computer system, the printer settings with a document (the abstract, lines 7-11), and sending the printer settings to the printer prior to printing the document (column 3, lines 1-16), wherein the potential sources include at least one set of user-selected printer settings selected by a user of the computer system (column 3, lines 17-19), and a set of content-provider-selected printer settings selected by a content provider (a node in the network) of the document (column 3, lines 1-16).

With regard to claims 2, 5, 6, 9, Shima discloses hierarchically choosing one of the potential sources for the printer settings (column 4, line 66 to column 5, line 9 and column 6, lines 1-35).

With respect to claim 3, Shima discloses the one set of user-selected settings includes a set of document-specific user-selected settings, and a set of application-specific user-selected settings associated with the application (column 5, lines 1-9).

With regard to claim 4, Shima discloses global settings stored on the computer outside of the application (column 5, lines 1-5).

With respect to claim 7, Shima discloses downloading document content from a remote computer system (column 6, lines 1-15).
